Mr. Harold McCloud
Rotary Club of Parker
PO Box 473
Parker, CO 80134

Dear Harold,

We've learned so much on our journey helping the Villagers of Kailer achieve the dreams they shared with us more than five years ago. It's an immensely rewarding experience filled with challenges we could not have imagined back when we started.

We now have clean water available to 40% of the Kailer families. We have villagers in trade school earning electrician and plumber certificates so they can provide maintenance of the water system. We have a young woman studying community health who will graduate this summer. We have seven kitchen gardens in place, three of which are producing food for those families and providing a source of income for school fees.

Along the way we overcame a highly salinized water supply that required a reverse osmosis system; hot water from thermally-heated underground water that required a specialized pump, and an 18-month drought that has left four of our kitchen gardens with no water for irrigation until we can develop a solution. But we're not deterred.

We're not deterred because we've learned we're not alone in wanting the best for Kailer. Thanks to donors like the Parker Rotary we've seen pictures of smiling faces, tasting fresh, clean water for the first time. We've witnessed the bounty of fresh fruits and vegetables unlike anything we could have imagined. We're confident that miracles like these will continue and any obstacles will be overcome.

Parker Rotary's gift of $3000 on December 13, 2022 to complete the funding of an AC power line, pole, transformer and service load to the existing water well in Kailer, is deeply appreciated. This is an important step towards providing water for the entire Kailer Community. Our dream for Kailer was to provide the resources necessary to *help people help themselves.* That is happening because of the Parker Rotary. They are on the path to thriving. The Rotary can be sure that its gift will help make a dramatic difference in their lives.

We are grateful that you've joined us on this journey.

Sincerely,

Douglas Hauth
VP of Development
